The COVID-19 pandemic led to months of “Stay at Home” orders across the country closing businesses, places of worship, daycares, and encouraging people to stay at home to avoid the spread of the virus. Now that these places are slowly reopening, how do you decide how or when to return to these places or who to start engaging with in-person? This worksheet will help walk you through the decision-making process by helping you weigh out your own risks and benefits of interacting with others in public spaces or in your homes again.

### 1 SITUATION

What are you trying to decide?

Who is involved? How many households?

### 2 LOCAL CONTEXT

Find your local COVID-19 activity level from the WI Dept. of Health Services.

- Circle the burden (cases per 100,000 population):
  - 0–50
  - 50–100
  - 100–500
  - 500–1,000
  - 1,000–2,000

- Circle the trend: Shrinking | Holding steady | Growing

- Circle the activity level: Low | Moderate | Moderately high | High

Have there been recent outbreaks or surges? Consider outbreaks in the communities of all the households involved.

Yes No Unsure

Have there been high-risk events (e.g., large gatherings) in your area?

Yes No Unsure

How do you feel about the local risk overall? Consider all the households involved if you don’t all live in the same area.

1 2 3 4 5

low risk high risk

### 3 POTENTIAL RISK

Does anyone involved have a higher risk of serious illness, or interact with someone at high risk? For example, older adults and people with chronic health conditions or poor immune systems, or who take medications that affect their immune system, have higher risk.

Yes No Unsure

Does your family have a plan in case someone gets sick? The Centers for Disease Control and Prevention (CDC) has useful information about making a plan.

Yes No Unsure

Does anyone involved have higher daily risk exposures? Activities are lower risk when they are short, infrequent, outdoors and involve fewer people. Safety measures such as wearing masks and physical distancing (staying 6+ feet apart) also help lower risks. Think about work/school, shopping, leisure outings, and other activities. Talk to others involved about their daily activities as well.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Yes</th>

</tr>
</tbody>
</table>
3 POTENTIAL RISK CONT.

What safety measures are reasonable for me, my family, and/or others involved? Check the applicable box(es).

- Physical distancing (6+ feet apart)
- Washing hands
- Staying outdoors
- Limit other interactions before and/or after
- Wearing masks
- Other (list below)
- No shared food/toys

How do you feel about the personal risk overall?

1 2 3 4 5

low risk high risk

4 POTENTIAL BENEFITS

What are the possible benefits for everyone involved? Consider physical, emotional, mental, social or spiritual needs.

What are the consequences of not meeting the needs listed above?

Is it possible to meet the above needs in other ways (e.g., by phone or videoconference)?

How long is the current situation sustainable without a change? Could you go on as you are for 3 months? 6 months? One year?

How do you feel about the potential benefits overall?

1 2 3 4 5

low benefit high benefit

5 MOVING FORWARD SAFELY

Look again at the potential risks and benefits. How do you feel about the balance? Circle one:

Benefits outweigh risks

Risks outweigh benefits

How have you decided to move forward?
